The Skinlogic Skin Scanner is used by Dermalogica® sales consultants and Skin Centres Following the success achieved by Dermalogica® it is now used in centres using Pevonia, Environ, Skinceuticals, Clarins, Guinot and Nimue to name a few.

You can use your own Digital Camera to take pictures for your client records.

The Beauty Scope: (Not a Scanner)

This is a skin magnifier – it magnifies the .5cm² area only ■
You are only looking at an area-magnified 50X
Comparison is difficult as do you need to find the precise area you looked at or photographed before
To take picture you need to use both hands as on some models the button is on the adaptor. A scope in the UK is available at between £1200 and £900.

I-SCOPE Skin Camera www.skinlogiconline.co.uk

The Skin Camera with the benefits:
